

CONTENTS

Issue 5

Research Articles

- 753 Comparison of Component-Based Structural Equation Modeling Methods in Testing Component Interaction Effects
Zhiyuan Shen, Gyeongcheol Cho, and Heungsun Hwang
- 766 On the Meaning of Measurement Invariance in Social Relations—Confirmatory Factor Analysis for Relative Variance Parameters
David Jendryczko and Fridtjof W. Nussbeck
- 780 Using Small-Variance Priors to Detect Covariate Misspecifications in Latent Class Analysis Models
Sarah Depaoli, Fan Jia, and Marieke Visser
- 801 Does Cluster-Robust Estimation Provide Within-Study Effects? A Comparison of Individual Participant Data Methods in MASEM
Lennert J. Groot, Kees Jan Kan, and Suzanne Jak
- 814 Accommodating Continuous Time Metrics Within the Discrete-Time Latent Change Score Model Using Definition Variables
Sarfraz Serang, Shawn D. Whiteman, and Annabelle H. Reese
- 832 Estimating the Root Mean Square Error of Approximation (RMSEA) with Multiply Imputed Data Under Non-Normality
Yunhang Yin, Amanda J. Fairchild, Dexin Shi, and Taehun Lee
- 858 Advances in the Study of Smoothing Methods for Correlation Matrices in Confirmatory Factor Analysis
Yijun Cheng and Oscar L. Olvera Astivia
- 866 Model Assumption Violations in Bayesian Latent Mediation Analysis: An Exploration of Bayesian SEM Fit Indices and PPP
Haiyan Liu, Ihnwhi Heo, Aleksandr Ivanov, and Sarah Depaoli

Teacher's Corner

- 897 Multilevel Multigroup Structural Equation Modeling In A Single-Level Framework
Julia-Kim Walther, Martin Hecht, Benjamin Nagengast, and Steffen Zitzmann
- 929 Discrete-Time Survival Analysis Incorporating Time Structure in Developmental Research
Sooyong Lee, Kahyun Lee, and Kejin Lee
- 941 Signaling Model Misspecification in Latent Class Analysis
Zachary K. Collier, Joshua Sukumar, Yiqin Cao, and Nicholas Bell

Issue 6

Research Articles

- 949 Uncovering Asymmetric Temporal Dynamics Using Threshold Dynamics Parameters
Jessica V. Schaaf, Øystein Sørensen, Ethan M. McCormick, Michael Aristodemou, and Rogier A. Kievit
- 966 The Correlation Thresholding Algorithm for Exploratory Factor Analysis
Dale S. Kim, Audrey Lu, and Qing Zhou
- 980 A Note on Comparing Equivalence Testing with Conventional Criteria in Evaluating the Overall Fit of Structural Equation Models
Katerina M. Marcoulides and Ke-Hai Yuan
- 986 Latent vs. Manifest Variable Analyses to Test Group Differences in a Two-Group Randomized Pretest-Posttest Design
Paolo Ghisletta and Fabio Mason
- 1000 A Simulation Study on the Interaction Effects of Underfactoring and Nuisance Parameters on Model Fit Indices
Melanie Viola Partsch, Philipp Sterner, and David Goretzko
- 1016 A Comparative Evaluation of a Conditional Median-Based Bayesian Growth Curve Modeling Approach with Missing Data
Dandan Tang, Xin Tong, and Jianhui Zhou
